

RoHS Compliance

This Declaration of Restriction of Hazardous Substances (RoHS) Compliance applies to materials supplied by The Metal Centre.

The Metal Centre hereby declares that materials supplied comply with the requirements of the European Union Restriction on Use of Hazardous Substances in Electrical and Electronic Equipment Directive 2015/863 ("RoHS") and UK Legislation Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (as amended).

The Metal Centre confirms that the listed RoHS restricted substances are not intentionally added to the materials and that any unintentional amount of the restricted substances found are within the relevant limitations of the RoHS directive.

EU RoHS is indicated by the European Conformity (CE) marking, tolerated in the United Kingdom until January 1, 2024, after which the UKCA marking becomes mandatory.

- Lead (Pb): < 1000 ppm
- Mercury (Hg): < 1000 ppm
- Cadmium (Cd): < 100 ppm
- Hexavalent Chromium: (Cr VI) < 1000 ppm
- Polybrominated Biphenyls (PBB): < 1000 ppm
- Polybrominated Diphenyl Ethers (PBDE): < 1000 ppm
- Bis(2-Ethylhexyl) phthalate (DEHP): < 1000 ppm
- Benzyl butyl phthalate (BBP): < 1000 ppm
- Dibutyl phthalate (DBP): < 1000 ppm
- Diisobutyl phthalate (DIBP): < 1000 ppm
- Butyl benzyl phthalate (BBP) (0.1%),

The Metal Centre does not manufacture any products, or supply to the end user customer, thus restricting our involvement and knowledge of their usage.

Where requested, The Metal Centre may carry out processes for the customer, such as surface finishing (polishing -grit belts / silicon belts), which do not affect the structure of the metals. These substances listed above are not added during the surface finishing process and may only be present as unavoidable trace impurities in concentrations well below the specified limits.

The Metal Centre has no compliance obligations under RoHS with regard to heavy metals in electrical equipment.

The Metal Centre contacts its current supply base to verify their compliance with appropriate legislation.

The only exception to compliance may occur where a grade of material is ordered by a customer, which requires the addition of one or more of the substances in order to comply with the standard/grade conditions of the British, European or International Standard. In this case, the material will contain a value of each substance in line with the standard requirements.

This statement is reviewed on a regular basis, in line with legislation.

Disclaimer

This Data is indicative only and as such is not to be relied upon in place of the full specification. In particular, mechanical property requirements vary widely with temper, product and product dimensions. Materials supplied by the Company may vary significantly from this data, but will conform to all relevant and applicable standards.

All information is based on our present knowledge and is given in good faith. No liability will be accepted by the Company in respect of any action taken by any third party in reliance thereon.

The information provided in this datasheet has been drawn from various recognised sources, including EN Standards, recognised industry references (printed & online) and manufacturers' data and no guarantee is given regarding its accuracy.

As the products detailed may be used for a wide variety of purposes and as the Company has no control over their use; the Company specifically excludes all conditions or warranties expressed or implied by statute or otherwise as to dimensions, properties and/or fitness for any particular purpose, whether expressed or implied.

Advice given by the Company to any third party is given for that party's assistance only and without liability on the part of the Company. All transactions are subject to the Company's current Conditions of Sale. The extent of the Company's liabilities to any customer is clearly set out in those Conditions; a copy of which is available on request.
