To Whom It May Concern,

**Re: WEEE Legislation**

The Metal Centre complies with the:

- European Waste Electrical and Electronic Equipment Directive 2012/19/EU
- UK Waste Electrical and Electronic Equipment Regulations 2013

The levels of Lead, Cadmium, Mercury, Hexavalent Chromium, Polybrominated Biphenyl (PBB) and Polybrominated Diphenyl Ether (PBDE) are all below the maximum permissible levels stipulated in the:

- Materials supplied by us
- European Union Restriction on Use of Hazardous Substances in Electrical and Electronic Equipment Directive 2015/863 ("RoHS")
- UK Legislation Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (as amended)

The only exception to this is, where a grade of material is ordered by a customer where the British, European or International Standard covering the grade requires a deliberate addition of one or more of the substances in order to comply with the standard/grade requirements.

In this case, the material will contain a value of each substance in line with the standard requirements.
